TOOLING

EIE places all the tools required for operations and works at the disposal of your teams.

A COMPLETE RANGE OF TOOLS

for operating, cleaning kerb valve boxes, preparation and cutting accessories for tubes, and a magnetic cover lifter.

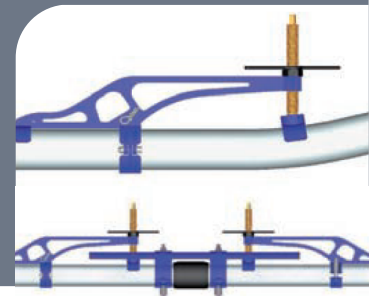

Operating tools

SPECIFIC PRODUCTS

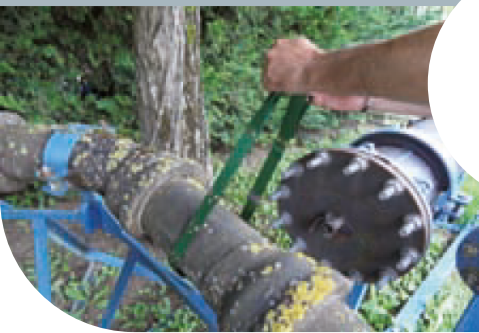

- to facilitate the fitting of cast iron or PE tubes,
- to straighten and hold PE pipes before welding an electrofusion part.

TOOLING

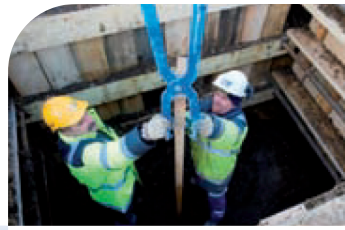

Cleaning tools

- Needle-nose pliers, gimlet, auger bit, scouring scoop, a **range of tools for cleaning kerb valve box tubes**.
- Operating wrench, blocking wrench, extension rod for **operating shut-off valves** and a magnet for **opening kerb valve boxes**.
- Products for **preparing worksites**: tube-scraper, deburring tools, circumference-meter, tube-cutter for all pipes.
- A **magnetic cover lifter** for safely lifting roadway castings with the least effort.

Worksite preparation

SPECIAL TOOLS

Formwork removal grip for damage-free, safe and effortless removal of timber formwork, enabling reuse.

Magnetop ladder support bracket

- Secure fixing of ladders on worksites
- Easy, magnetic installation
- Compatible with all standard ladders

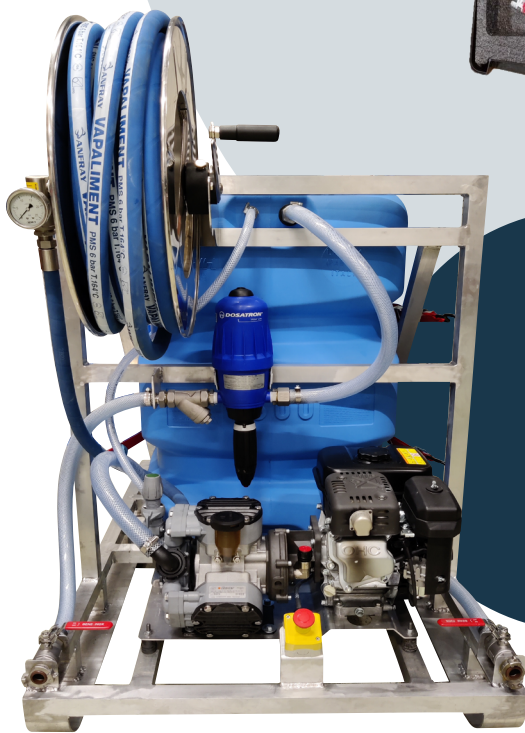

EQUIPMENT FOR TESTING PIPES AND THE WATERTIGHTNESS OF ALREADY INSTALLED PRODUCTS

The EIE thermal testing pump

- easy to transport
- all-terrain treaded puncture-proof wheels
- possible to easily fit a pressure recorder.

Pressure recorder

Testing and disinfection pump

A dual-function piece of equipment to save time when putting into service

the testing and disinfection pump that tests pipes after works or installation, while injecting disinfectant into the network

- pipe pressure tests
- disinfection of the water supply network
- all with just one piece of equipment

Test kit for drilling machine

- used to check the tightness of the clamp or tee on the pipe before drilling under pressure.
