

Preserving Water resources

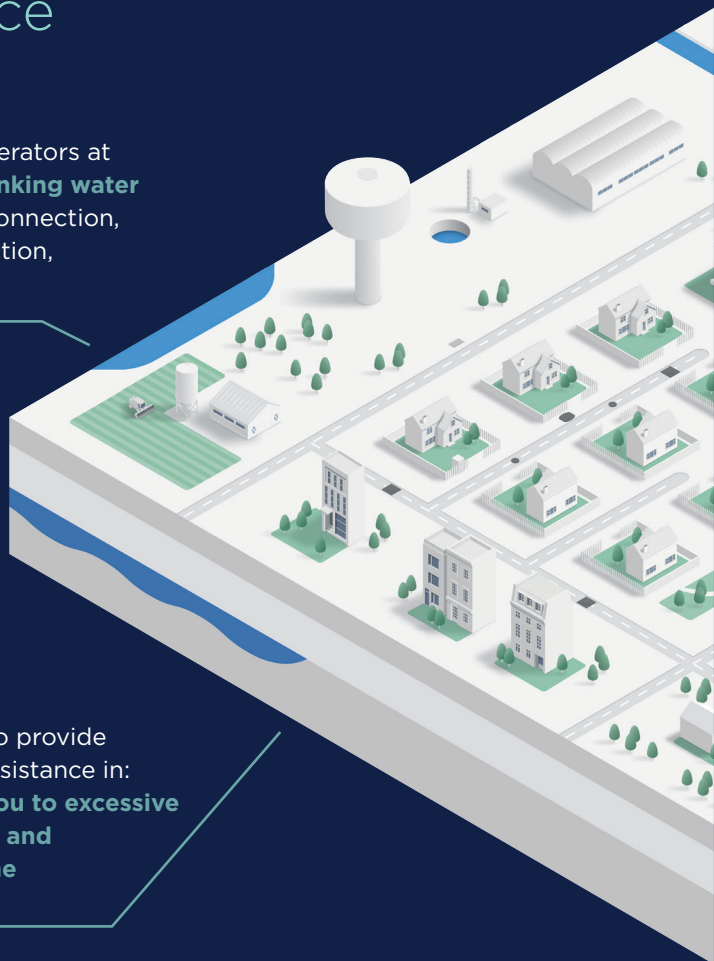

**Drinking water, wastewater
and natural water networks**

Preserving Water resources through network performance

Present alongside all operators at **critical points in the drinking water network**: branch lines, connection, consumer house connection, delivery points

Solutions and services to provide you with support and assistance in: **saving water, alerting you to excessive consumption and leaks, and remotely shutting off the water supply**

Drinking water

Wastewater

Natural water

claire

Connected measuring instruments
and platforms to **monitor the
condition and efficiency of water
networks and preserve the
natural environment**

Leak detection
devices that can be
adapted to any situation

GROUPE CLAIRE

Network Equipment

- Connection and Repair, Sectioning and Protection, Network access devices

ADG
GROUPE CLAIRE

Intervention solutions

- Under-pressure drilling, tools and customised services

E.I.E
GROUPE CLAIRE

THE CLAIRE GROUP, YOUR PARTNER TO...

Water resources

Measurement and Instrumentation

- Independent and connected measurement and recording systems for water monitoring, Supervision

claire
CONNECT

Irrigation

- Raw water metering and distribution equipment for irrigation networks

SL-IRRIGATION
GROUPE CLAIRE

Private networks

- Equipment for water and gas networks for buildings and industry

claire PRO
GROUPE CLAIRE

Water networks, a vital issue

Asset value: **300 billion euros**

DRINKING WATER

960,000 km

of drinking water supply network

50%

of the network
is over
40 years old

0.6%

of the network
renewed each year

Over 20%

of drinking water produced
is lost through leaks,
**amounting to 1.3 billion
cubic metres of water**
each year

WASTEWATER & NATURAL WATER

425,000 km

of network, wastewater and rainwater combined

0.4%

of the network
renewed each year

2/3

of separate
systems

1/3

of combined
systems

CSR | POLICY AND COMMITMENTS

The Claire Group, **a leading force in the water sector**, is committed to **preserving Water resources** and safeguarding responsible water usage

Environmental certifications and initiatives

- ISO 9001, 14001 and 45001 certifications
- EcoVadis ratings

Carbon footprint

- Yearly measurement of greenhouse gas emissions
- Charting a decarbonisation strategy

Supplier commitment

- Code of conduct and supplier audits

claire

**COMMITTED to
PRESERVING WATER
RESOURCES**, our
actions involve:

Designing and manufacturing **reliable, durable equipment** for the construction, maintenance and refurbishment of water distribution networks to ensure their sustainable efficacy.

Developing products and systems for diagnostics, monitoring and management to **improve the performance of water networks**.

Providing resources and information to allow everyone to **optimise their use of water**.

over 330 employees

including 40 dedicated to the sales force

**over €110 million
in revenues**

OUR VALUES

Quality

Products designed to last throughout the entire service life of the water network
Reliable and tried-and-tested diagnostic and monitoring systems
French and German made

Confidence

180 years of industrial know-how
Certified drinking water connections, smart boxes, irrigation products and monitoring systems
Origine France Garantie (Guaranteed French Origin)
Thousands of communities equipped for more than 150 years

Commitment

To managing and preserving water resources
To using and recycling an outstanding, corrosion-resistant raw material: bronze
Packaging made with recycled and recyclable materials

Service

A team at your disposal, attentive to your needs, to advise and guide you in your projects and in choosing equipment
An application for full access to the entire range and the associated documentation.
A website where you can place orders online, with your customised terms and conditions and tracking of your commercial transactions.
Assistance for putting into service, after-sales service
Equipment-hire for your measurement campaigns or interventions
A bespoke training centre, working in real-world conditions

Preserving water resources throughout the entire cycle,
by providing innovative, sustainable and customisable
solutions to manage drinking water, wastewater and
natural water networks in optimum conditions.
