Optimise network performance

claire
CONNECT

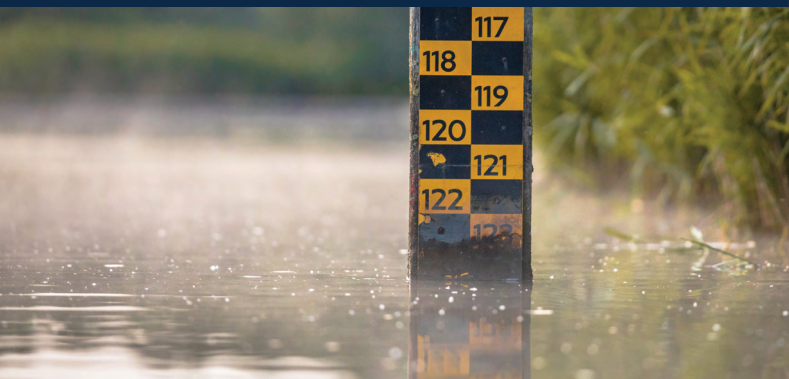

Claire Connect combines the **Ijinus** and **Hydreka** brands. Its mission: to facilitate network monitoring and improve network performance through self-contained, connected metrology solutions that cover measurement, instrumentation and monitoring.

iJINUS
GROUPE CLAIRE

HYDREKA
GROUPE CLAIRE

The **PERMANENT** offering

for operators, local authorities and installers seeking to monitor the performance of their water networks without investing in civil engineering projects.

The **TEMPORARY** offering

for engineering design offices, operators, local authorities and inspection bodies seeking to conduct diagnostics and audits of their network operations through targeted measurement campaigns.

CLAIRE CONNECT, your RENTAL partner

to boost flexibility while keeping investment costs under control and contributing to a sustainable approach.

With Claire Connect, you can take advantage of:

a **comprehensive range**

innovative solutions based on cutting-edge, patented and certified technologies

a **Permanent** offering and a **Temporary** offering

expert, personalised support for operators and Engineering design offices

a **single point of contact**

**Drinking
water**

Wastewater

Natural water

Connected **MONITORING**

for real-time monitoring through equipment designed to adapt to the latest generation of communication protocols.

Secure **SERVICE**

to comply with the latest regulations on data protection and cybersecurity.

CUSTOM-designed

to improve the efficiency of your temporary diagnostics through equipment and service solutions geared towards the regular installation and relocation of your equipment.

Self-contained **POWER SUPPLY**

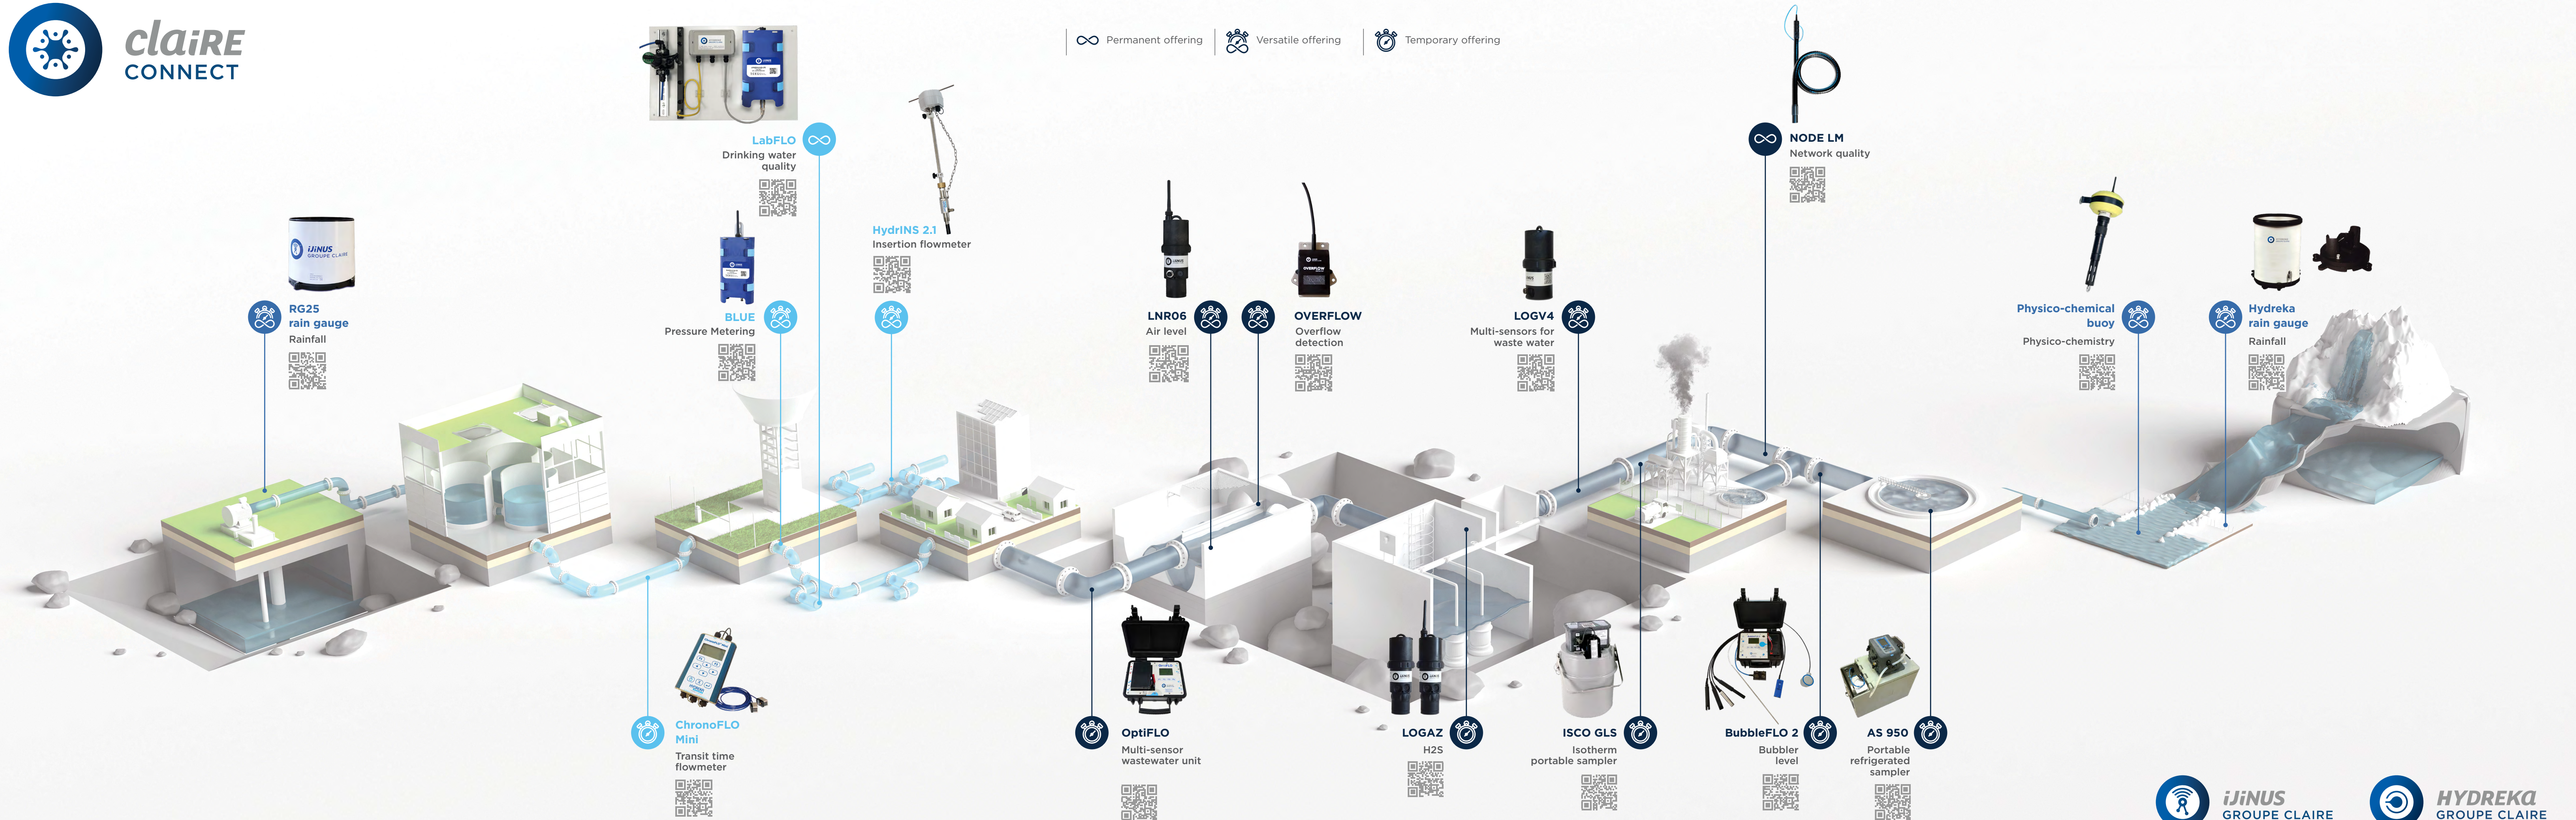

to reduce costs and installation constraints associated with on-site power requirements.

EXPRESS service

thanks to a wide range of equipment available on the spot, with a quote and dispatch possible within 24 hours.

ADVISORY support services

with individually tailored guidance and dedicated technical support to address every challenge in your projects.
